

Empathy Map

Date	15 March 2024
Team ID	VBCUA-01
Project Name	Voice-Based Concept Understanding Analyser (VBCUA)
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS - I want to know if my explanation is correct. - I need feedback on my speaking clarity. - I want a report to track my performance.	THINKS - Did I cover the key points? - Are my pauses and filler words affecting clarity? - How can I improve next time?
PERSONA NAME (Role / User)	
DOES - Uploads an audio explanation. - Reads AI-generated feedback. - Downloads the PDF report and practices again.	FEELS - Curious about the result. - Slightly nervous about mistakes. - Motivated to improve understanding and fluency.
